

MANAGED SERVICES

Expert, AI-enabled management of your Azure environment.

Your time should be spent looking for ways to grow and support your business, not managing cloud technology. 3Cloud Managed Services can help. Born in the cloud and 100% focused on Microsoft Azure, 3Cloud Managed Services empowers clients to focus on their business while we proactively ensure a stable, secure and continuously improving Azure cloud environment.

Our Services

From Infrastructure and Data & AI to AppDev and DevOps, we offer comprehensive AI-enabled managed services tailored to your business needs. Whether you need a partner to fully manage your Azure environment or supplement your internal teams, 3Cloud is your trusted Managed Services provider.

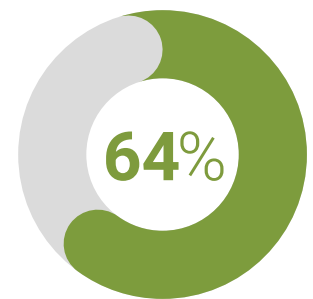

Streamline Operations: Pinpoint monitoring and expert action, both reactive and proactive, keep your environment stable and secure.

Enable Growth: Governance and service delivery, backed by best practices and bespoke reporting, help you scale with confidence.

Evolve Seamlessly: Strategic account management ensures continuous improvement, cost optimization and alignment with business goals.

64% of growing organizations are **using some form of managed services** to help enable their business.

Managed Platform

Operate smarter by streamlining IT processes and simplifying cloud workload management. Includes 24x7 AI-enabled monitoring, infrastructure maintenance, governance and FinOps-driven spend optimization.

Managed Data

We remove the burden of managing data, reducing disruptions and enhancing your data platform. From Power BI report development and ETL management to SQL database administration, our experts support and improve your analytics environment so you can focus on driving business outcomes.

Managed AI

Ensure your AI initiatives deliver consistent value and performance with model performance management, use case monitoring and platform support—including LLMOps, prompt drift remediation and monthly reporting—to help you scale AI responsibly and effectively.

Managed AppDev

Support and enhance your custom Azure applications with ongoing development, testing, bug fixes and architecture guidance. We also provide 24x7 performance monitoring, release management and security reviews to ensure your applications remain reliable and aligned with business needs.

Managed DevOps

Accelerating delivery and enforcing governance across your DevOps lifecycle, we manage CI/CD pipelines, version control, release processes and DevSecOps practices across data, applications and infrastructure—ensuring your teams can deploy faster and more securely.

Managed AVD (Azure Virtual Desktop)

Keep your virtual desktop environment secure, scalable and cost-effective. We provide 24x7 monitoring, host pool provisioning, auto-scaling, image updates and spend analysis—ensuring your users stay productive and your environment stays optimized.

The 3Cloud Advantage

Whether you're outsourcing Azure operations or augmenting internal teams, 3Cloud delivers expert, AI-enabled support across infrastructure, data, AI, applications, DevOps and virtual desktops—so you can stay focused on innovation and growth.

“By moving to 3Cloud Managed Support (CSP) and then 3Cloud Managed Platform, we were able to optimize our Azure spend. 3Cloud helps us take advantage of Azure pricing efficiencies while providing excellent management and support for our environment.”

- CEO, Software Development Firm
